

1. Review of different sorting algorithms.
2. Review of different dynamic programming algorithms.
3. Review of different greedy algorithms.
4. Review of different scheduling algorithms.
5. Review of different Root calculation algorithms.
6. Review of different equation solving and matrix algorithms.
7. Review of different graph algorithms.
8. Review of different normalization techniques.
9. Review of different UML diagrams.
10. Review of different classification algorithms.
11. Review of different clustering algorithms.
12. Review of different association rule mining algorithms.
13. Review of different skyline algorithms.
14. Review of different big data algorithms.
15. Review of different IOT algorithms.
16. Review of different Block Chain algorithms.
17. Review of different Bangla language processing algorithms.
18. Review of different Information retrieval algorithms.
19. Review of different Information extraction algorithms.
20. Review of different keyword queries algorithms.
21. Review of different No SQL databases algorithms.
22. Review of different game playing algorithms.
23. Review of different interpolation algorithms.
24. Review of different road sign detection algorithms.
25. Review of different document processing algorithms.
